

side-effects

27/03/09

Although HIV drugs are less toxic today than in the past, side-effects remain a major obstacle to adherence and quality of life for those living with HIV.

If you want to find out more – come and listen to the discussion and have your questions answered.

- Debunking the myths.
- Are severe side effects a thing of the past?
- Coping with side-effects.
- Should I switch treatments?
